During the Biennale Interieur in Kortrijk, Hollands Licht will present new products and prototypes from talented Dutch designers. The presentation will take place at 'The Floor is Yours', a platform for young designers and design brands.

Hollands Licht finds inspiration in upcoming designers who have a unique perspective on light, material and use. The collection consists of elegant LED fixtures with high level of light comfort. The products are created with the help of local manufacturers and social workshops.

Timber floor

Ernst Koning

The work of Ernst Koning can be recognised by its orderly, functional character with a creative twist. He designed the Timber pendant lights for Hollands Licht back in 2013. Next year, the family will be expanded with the addition of an elegant floor lamp, to be presented in Kortrijk. The shades in the Timber collection are turned from high quality oak, walnut or ash wood.

King Arthur wall

Jesse Visser

Creative research into construction and techniques leads designer Jesse Visser to high quality designs. Previously, he designed the King Arthur pendant lamp, made of anodised aluminium with an elegant matte surface. Following on from this collection, minimalistic King Arthur wall lights will also be available soon.

Vapour

Studio Thier&VanDaalen

The work of Iris van Daalen and Ruben Thier is striking for the surprising contrast between geometric and organic shapes. Vapour originated from a fascination with the structure and movement of nature: the way a flower blossoms, the hypnotising effect of flowing water, vapour that moves as a wave through the air. This impressive light is presented in here by Hollands Licht for the first time.

Manu

Erwin Zwiers

Designer Erwin Zwiers is inspired by materials with unique characteristics. Exploring material in his own experimental way leads him to design surprising pieces and products. Fascinated by birds in flight and the archetypal V-shape of a bird drawing, he developed the Manu pendant light. The design is characterised by the visible assembly elements which tell a clear production story.

Limpid Light

Esther Jongasma en Sam van Gurp (studio VANTOT)

Sam and Esther experiment with movement. Their capacity for exploration results in beautiful projects and products. The Limpid Lights delightfully combine hand-blown glass with an innovative LED system.
